## SUMMARY

Web developer with a focus on modern technologies like Python, Django, JS and a passion for building reliable, efficient applications. Bringing more than 5 years experience in leadership and a strong work ethic.

## WEB DEVELOPMENT PROJECTS

### Full-stack developer

[AI Learning Platform](#) 2025

- Create a scalable platform capable of generating personalized educational content in real time.
- Built an AI-driven system leveraging Large Language Models (LLMs) to dynamically generate and deliver adaptive learning material.
- Delivered a responsive and efficient learning experience with real-time content generation and strong backend reliability.

### Full-stack developer

[MealMetrics](#) 2025

- Design a platform to simplify dietary planning through data collection and nutritional analysis.
- Developed a web app enabling users to manage recipes, track meals, and analyze nutritional data using Django, Pandas, and Matplotlib.
- Streamlined meal tracking and analysis through intuitive data visualization and automated insights, enhancing users' dietary planning efficiency.

## EXPERIENCE

[Team Lead & Manager, Vox Bar, Grand Hyatt Berlin](#) 2017 - 2024

- Managed a high-pressure hospitality environment requiring efficient operations, strong leadership, and customer satisfaction.
- Led a team to deliver consistent service - managed inventory and budget - created new menus - resolved complaints - and ensured smooth daily operations.
- Improved team performance and guest satisfaction while achieving monthly sales targets and maintaining a high standard of service.
