SUMMARY

Full-Stack Developer with experience in building responsive web applications and optimizing backend systems. Delivered freelance projects, including a custom audio mixing analysis tool that streamlines mixing workflows through AI-powered technical feedback. Skilled in React, TypeScript, Python, Django, and FastAPI, with a focus on writing clean, maintainable code. Strong problem-solver with excellent communication skills and a commitment to delivering high-quality, reliable solutions.

WORK EXPERIENCE

Lead Developer | MixScope - Audio Mix Analyzer 2025 - 2026
Freelance

- Developed an AI-powered mixing analysis tool that reduced client mix analysis time by ~70%.
- Led project management using Agile/Scrum practices, coordinating between client, UI/UX designer, and audio engineer through sprint cycles. Conducted requirement analysis, sprint planning, and regular reviews to ensure alignment on deliverables and maintain project velocity.
 - Designed and built a Python/FastAPI backend with async processing pipeline that extracts audio metrics and generates structured feedback via LLM integration.
 - Established testing and quality assurance processes including edge case handling for various audio formats, validation of extracted metrics against industry standards, and iterative refinement based on production use feedback.
 - Implemented security measures including rate limiting (SlowAPI), file validation, and CORS configuration for 120MB file uploads supporting multiple audio formats.
 - Built an interactive React/TypeScript frontend with a multi-step upload workflow, and tabbed analysis sections designed in collaboration with a UI/UX specialist.

Team Leader / Manager 2017 - 2024
Vox Bar, Grand Hyatt Berlin

- Managed daily operations of a high-volume bar in a luxury hotel environment, leading a team of 7 staff members through service delivery, inventory management, budget control, and customer relations.
- Led team training and scheduling to maintain consistent service quality, resulting in 10% sales growth and 5% cost reduction while exceeding guest satisfaction benchmarks.
 - Developed a custom inventory tracking application to streamline stock management, reducing manual counting time and improving order accuracy.
 - Created seasonal menu concepts, collaborating with suppliers and management to optimize product offerings and profitability.
 - Resolved escalated customer complaints and operational challenges in real-time, maintaining composure and problem-solving effectiveness in high-pressure situations.

WEB DEVELOPMENT PROJECTS

Full-Stack Developer 2025
AI Learning Platform

- Built an educational platform that generates personalized learning paths using AI-powered content generation and adaptive difficulty assessment across 15 subject areas.
- Architected asynchronous processing system using Celery and Redis, improving user experience by eliminating 60+ second wait times through background content generation.
 - Integrated Groq LLM API with Pydantic validation to generate 120+ lessons per subject with consistent JSON structure and markdown rendering.
 - Deployed multi-container architecture on GCP using Docker (Django, Celery, Redis) with Neon PostgreSQL, implementing CI/CD pipelines via GitHub Actions.

SKILLS

Languages
JavaScript - TypeScript - Python

Frontend
React - NextJS - HTML/CSS
Tailwind

Backend
Django - FastAPI - PostgreSQL
MongoDB - Redis - Celery

DevOps & Tools
Docker - Git - Github Actions
GCP

EDUCATION

Full-Stack Web Development Program
CareerFoundry, 2025

Python for Web Development
CareerFoundry, 2025

LANGUAGES

Italian	Native
English	Fluent
German	Conversational
